

About Us

Founded in 2000, the Highland Group, LLC was one of the first developers of medical websites and secure online patient forms, with a nationwide customer base of thousands of medical and dental practices, hospitals and healthcare associations.

Our Government Forms division is a natural offshoot of our Forms Team division, bringing all their specialized features and procedures to serve an exciting new market.

Core Competencies

Our forms' user-friendly features:

- **Responsive Design** – legible on any device
- **Electronic Signatures** – legal in every state
- **Document Uploads** – accepts any format
- **Save and Resume** – stored form progress
- **Multi-Lingual** – 108 language translation
- **Conditional Logic** – smallest possible form
- **Fully Accessible** – ADA compliant
- **Fully Secure** – HIPAA compliant security
- **Anti-Spam** – never a spam submittal
- **Required Elements** – everything you need
- **Autofilled Fields** – no duplicate field-filling

Differentiators

- All forms are custom built – not a “build your own forms” or “drag-and-drop” system.
- We build each form twice – once for maximum ease of use, once more to match the look and feel of your original forms.
- All forms retain their field and font sizes no matter what device they’re viewed on.
- Our Round-Trip system allows your staff to add info to submitted forms and resubmit them to keep the entire form online.
- Submitted forms come back to your office in a standard PDF format document, or as an Excel-type CSV file, or SFTP to your server.
